PROFESSIONAL SUMMARY

Self-taught and fast-learning Full-Stack Developer with a strong passion for building user-focused web applications. Adaptable, solution-oriented, and thrives in collaborative environments.

EXPERIENCE

- **Backend Developer Intern – Ocube**
- Remote | March 2025 – Present
- Contributing to the backend of an e-learning platform, focusing on course delivery and interactive tools.
- Key Contributions:
- Developed RESTful APIs for course and user management.
- Managed user authentication, data modeling, and server-side logic.
- Collaborated with frontend developers for seamless integration.
- Tech Stack: Node.js, Express.js, MongoDB, Git

PROJECTS

CIRCLEKONNECT (FULL-STACK PERSONAL PROJECT)

- A social e-commerce web app that combines user authentication, product shopping, post comments, and real-time messaging – built to explore your friends' inner circle.
- Key Features:
- Authentication: Sign Up, Sign In, Guest Login (with restrictions), Logout, and personalized Welcome page.
- E-commerce: Product browsing, shopping cart, and checkout with Redux for state management.
- Comments: Users can comment on posts.
- Real-Time Chat: Instant messaging powered by Socket.IO.
- Tech Stack: React, Node.js, Express, MongoDB, Redux, Socket.IO
- [🔗 Live Demo](https://full-stack-shop-rouge.vercel.app/): https://full-stack-shop-rouge.vercel.app/

TODO-APP (React Native)

- A mobile to-do list application built with React Native, designed for personal task management.
- Features: Create, update, and delete tasks on the go. Used daily for personal productivity.
- Tech Stack: React Native, JavaScript
